Technical Summary

Motivated Full Stack Developer (MERN Stack) and B.Tech Computer Science Engineering student (4th Year) with strong problem-solving skills and hands-on experience in developing responsive web applications **C++**, **Data Structures & Algorithms**, and experience building scalable backend systems using **REST APIs**, and **real-time systems**. **Skilled in React.js, Node.js, MongoDB, and**. Strong problem-solving

Education

- **Dr. A.P.J. Abdul Kalam Technical University** 2027
Bachelor of Technology in Computer Science and Engineering Kanpur, Uttar Pradesh
- **Class XII (Intermediate) – 50%** 2023
UP Board Ghazipur, Uttar Pradesh

Technical Skills

- **Programming Languages:** C++, JavaScript, Python
- **Backend Development:** Node.js, Express.js, RESTful APIs
- **Frontend Development:** React.js, HTML, CSS, Tailwind CSS
- **Databases & Caching:** MongoDB, MySQL
- **Tools & Practices:** Git, Postman
- **Libraries & Integrations:** Gemini API, AI Agentic Systems
- **CS Fundamentals:** Data Structures & Algorithms, OOPs, OS, DBMS, CN, Software Engineering

Projects

- **DR AITD Management System** | MERN Stack, JWT, Redis, AWS SES 
 - Developed a **full-stack hospital management system** with role-based dashboards for patients, doctors, and admins to manage appointments, schedules, and medical records.
 - Implemented secure authentication and authorization using **JWT**, **bcrypt**, **HTTP-only cookies**, and **OTP verification via AWS SES** to ensure secure user access.
 - Built scalable REST APIs using **Node.js**, **Express.js**, **MongoDB**, and **Redis caching**, improving backend performance, reducing database load, and enabling faster response times.
 - Added admin features including doctor approval workflows, appointment monitoring, and user management to streamline hospital operations.
- **FLASH CHAT – Real-Time Chat Application** | React, Node.js, Socket.IO, MongoDB, JWT 
Currently Working
 - Developed a **real-time chat application** supporting personal and group messaging with typing indicators and online presence tracking using Socket.IO.
 - Implemented secure authentication using **JWT** and **bcrypt** with protected routes and secure session handling across frontend and backend services.
 - Optimized backend communication with **Node.js**, **Express.js**, and **MongoDB** to deliver low-latency messaging and efficient real-time event synchronization.

Achievements & Profiles

- **LeetCode:** [Profile](#)
- **DSA:** Solved 201+ problems across coding platforms [Codolio](#)
